

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method comprising:

storing content on a portable memory device, said content including an image captured using a recorder/playback device;

detaching the portable memory device from the recorder/playback device; and

displaying the image on the portable memory device while the portable memory device is detached from the recorder/playback device; and

displaying functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.

2. (Canceled).

3. (Previously Presented) The method according to Claim 1 further comprising transmitting the content from the recorder/playback device to the portable memory device.

4. (Previously Presented) The method according to Claim 1 further comprising selecting the image for display on the portable memory device.

5-6. (Canceled).

7. (Previously Presented) The method according to Claim 1 further comprising selecting a mode to display the image, wherein the mode includes displaying the image as part of sequentially displaying multiple pieces of content.

8. (Previously Presented) The method according to Claim 1 further comprising selecting a mode to display the image, wherein the mode includes displaying the image as part of simultaneously displaying multiple pieces of content.

9. (Original) The method according to Claim 1 wherein the recorder/playback device is a digital camera.

10. (Original) The method according to Claim 1 wherein the recorder/playback device is a video camera.

11. (Original) The method according to Claim 1 wherein the recorder/playback device is an audio recorder/player.

12. (Original) The method according to Claim 1 wherein the recorder/playback device is a computer.

13. (Previously Presented) The method according to Claim 1 wherein the recorder/playback device is a television.

14-21. (Canceled).

22. (Currently Amended) The method of Claim 1, wherein ~~the portable memory device displays functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device~~, said functional controls include soft keys that are particular to the recorder/playback device.

23. (Previously Presented) The method of Claim 1, wherein the portable memory device is configured to include an attachment area, said attachment area including a magnet for attaching the portable memory device to a metallic object, such that the portable memory device displays the image while attached to the metallic object.

24. (Currently Amended) A portable memory system, comprising:
interface means for connecting to and detaching from a recorder/playback device;
storage means for storing content including an image captured using the recorder/playback device; and
display means for displaying the image while the portable memory system is detached from the recorder/playback device; and
the display means is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.

25. (Previously Presented) The portable memory system of Claim 24, wherein ~~the display means is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device~~, said functional controls include soft keys that are particular to the recorder/playback device.

26. (Previously Presented) The portable memory system of Claim 24, further comprising:
an attachment area, including a magnet for attaching the portable memory system to a metallic object, such that the display means displays the image while the portable memory system is attached to the metallic object.

27. (Previously Presented) The portable memory system of Claim 24, wherein the interface means connects to and detaches from the recorder/playback device via a wireless connection.
28. (Previously Presented) The portable memory system of Claim 24, wherein the image is displayed as part of sequentially displaying multiple pieces of content.
29. (Previously Presented) The portable memory system of Claim 24, wherein the recorder/playback device is a digital camera.
30. (Previously Presented) The portable memory system of Claim 24, wherein the recorder/playback device is a computer.
31. (Currently Amended) A portable memory device, the portable memory device comprising:
 - an interface, which connects to and detaches from a recorder/playback device;
 - a memory, in operative communication with the interface, which stores content including an image captured using the recorder/playback device; and
 - a display, in operative communication with the memory, which displays the image while the portable memory device is detached from the recorder/playback device; and
 - the display is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.
32. (Previously Presented) The portable memory device of Claim 31, wherein ~~the display is configured to display functional controls for the recorder/playback device while the portable~~

~~memory device is connected to the recorder/playback device, said functional controls include soft keys that are particular to the recorder/playback device.~~

33. (Previously Presented) The portable memory device of Claim 31, further comprising: an attachment area, including a magnet for attaching the portable memory system to a metallic object, such that the display means displays the image while the portable memory system is attached to the metallic object.
